## MEMORANDUM

TO: $\quad$ Houston ISD Board of Education
FROM: Daniel Gohl
Chief Academic Officer

## SUBJECT: HOUSTON ISD PERFORMANCE ON THE 2013 NAEP ASSESSMENT

CONTACT: Daniel Gohl, 713-556-6024
Because HISD is a district committed to evaluating and improving our practices, we voluntarily participate in what is known as the Nation's Report Card - a survey of 21 large urban districts across the nation. The National Assessment of Educational Progress (NAEP) compares student performance using a scale score at the fourth- and eighth-grade levels and group labels of Basic, Proficient, and Advanced.

We are compared to other large cities across the nation (populations exceeding 250,000) and to the other participating urban districts. The results will be embargoed until noon today and I wanted to give you a glimpse of what they show before the results are made public.

Houston ISD continues to exceed large city and national averages across all student demographic groups in mathematics. However, the performance of our African American and Hispanic students is not consistently above the national or large city levels. Some data points:

- Reading scores unchanged: The average scale scores for fourth- and eighth-grade reading are at essentially the same levels as previous administrations.
- Strong performance in math: Each student group demonstrated higher average scores than similar student groups in the nation's public schools and public schools in large cities.

The bottom line: We are doing better than most of our peers, but we are not where we should be with our student's achievement.

HISD staff has begun an intensive examination of performance on this assessment, and I will be working with our Chief of Schools to update our academic plans, school guidance, and budgetary allocations. We are already aware of the urgent need to apply consistent literacy practices across our schools so we may see the same turnaround in reading that we've seen in math.

You may remember at the start of the 2013-2014 school year, non-negotiables were implemented at every school that did not meet state accountability standards. Superintendent Grier worked together with principals to establish clear expectations and plans to track improvement over the school year using shared data. Funds were allocated to support intensive interventions - longer school days, guided tutoring, directed reading, and a daily reading schedule - at low-performing schools.

I will be working with our community to implement a comprehensive literacy plan to address the challenges underscored by this report. I look forward to sharing this information with you, in greater detail, at the Board Retreat in January.

## MEMORANDUM

TO: Terry B. Grier, Ed.D<br>Superintendent of Schools<br>FROM: Carla Stevens<br>Assistant Superintendent, Research and Accountability<br>SUBJECT: NATIONAL ASSESSMENT OF EDUCATIONAL PROGRESS (NAEP): READING \& MATHEMATICS 2013 RESULTS

The 2013 NAEP reading and mathematics assessment results have been released. NAEP, also known as the Nation's Report Card, is the nation's only federally authorized survey of student achievement in various subject areas. NAEP is administered by the National Center for Education Statistics (NCES), an agency within the U.S. Department of Education's Institute of Education Sciences.

Student performance on the 2013 NAEP reading and mathematics assessments at grades 4 and 8 is reported by using scale scores, which represent equal units on a continuous scale, using numbers that range from 0 to 500 . Also, student performance is reported by using the percentage of students who attained the achievement levels, Basic, Proficient, and Advanced. The National Assessment Governing Board (NAGB) defines the achievement levels as follows:

- Basic: denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at each grade.
- Proficient: represents solid academic performance for each grade assessed. Students reaching this level have demonstrated competency over challenging subject matter, including subject matter knowledge, application of such knowledge to real-world situations, and analytical skills appropriate to the subject matter.
- Advanced: signifies superior performance.

The reading framework specifies three reading behaviors, or cognitive targets: locate/recall, integrate/interpret, and critique/evaluate. Additionally, the framework calls for a systematic assessment of meaning vocabulary. The NAEP assesses mathematics in five content strands: number properties and operations, measurement, geometry, data analysis and probability, and algebra.

Results of the 2013 NAEP grade 4 and 8 reading and mathematics assessments are presented in Figure 1. Due to sampling methods used by NCES, results are only available at the district level and not at the school level. Comparisons were made between 21 participating districts: Albuquerque, Atlanta, Austin, Baltimore, Boston, Charlotte, Chicago, Cleveland, Dallas, Detroit, District of Columbia, Fresno, Hillsborough County (Tampa, FL), Houston, Jefferson County (Louisville, KY), Los Angeles, Miami-Dade County, Milwaukee, New York City, Philadelphia, and San Diego-as well as Texas, the nation, and the Large City comparison group. These results present the sixth administration of the reading assessment and the fifth administration of the mathematics assessment for the TUDA. Not all districts have participated over that time but Houston is one of the six original TUDA districts since its inception in 2002.

In interpreting NAEP performance in the various jurisdictions, it is important to note that while the 21 TUDAs represent some of the largest urban school districts in the country, there are substantial differences among them. Not only are the demographic characteristics different but there is a stark difference in percentage of students that are eligible for free/reduced price lunch (ranging from 52 to 100 percent) and the percentage of English Language Learners (ranging from 2 to 50 percent).

Figure 1. NAEP Scale Scores: Houston*, Large City, and Nation Reading and Mathematics Grades 4 and 8 2002-2013

[^0]
## Mathematics

- A notable achievement for Houston is that the Asian, Black, Hispanic, White, and free/reduced price lunch student groups in grades 4 and 8 demonstrated higher average scores than similar student groups in the nation's public schools and public schools in large cities.
Grade 4 Mathematics
- In 2013, the percentage of students in HISD who performed at or above Basic was $80 \%$. This was greater than public schools in large cities at $75 \%$.
Grade 8 Mathematics
- Only four districts outperformed HISD in $8^{\text {th }}$ grade math.

## Reading

- Average scale scores for 4th and 8th grade reading are essentially at the same levels as in 2007.
Grade 4 Reading
- Houston outperformed 11 urban districts including Dallas, but was just below public schools in large cities.
- The average scale score in $4^{\text {th }}$ grade reading is 4 points below the public schools in large cities ( 208 vs. 212) and 13 points below the nation's public schools (208 vs. 221).
Grade 8 Reading
- Houston outperformed 9 urban districts including Dallas, but was below public schools in large cities.
- Since $2007,8^{\text {th }}$ grade reading average scales scores have remained flat at 252 while public schools in large cities has increased by 8 points, from 250 to 258 and the nation's public schools has increased by 5 points from 261 to 266.

Appendix A provides an overview of HISDs performance overtime by grade and subject. Additional reference tables are also provided in Appendix B. Data tables produced by NAEP can be found on the HISD website or the NAEP website which includes the Nation's Report Card, the full set of national and state results in an interactive database as wells as related questions, scoring guides and question-level performance data.

NAEP 2013 Mathematics and Reading Results

## NAEP 2013 Mathematics and Reading Results

What is NAEP?
Grade 4 Mathematics Results Grade 8 Mathematics Results
Grade 4 Reading Results
Grade 8 Reading Results

## What is NAEP?

- The National Assessment of Educational Progress (NAEP) is the largest continuing and nationally representative assessment of what our nation's students know and can do in core subjects.
- A survey designed to produce national, state, and select urban district level results.
- NAEP results are for populations of students, not for individual students nor schools.
- Measures student performance nationally and reports changes over time.
- Allows comparisons between states and the nation.

## NAEP School and Student Selection

- NAEP uses a carefully designed sampling procedure for the assessment to be representative of the geographical, racial, ethnic, and socio-economic diversity of schools and students in the state.
- First, schools are selected to be representative of schools.
- Then, within each chosen school students are randomly selected to participate. Each participating student represents hundreds of other similar students.

## NAEP Administration

- NAEP is administered over a six-week period.
- For 2013: January $28^{\text {th }}-$ March $8^{\text {th }}$
- About 3,000 students in approximately 100 schools are selected in each state for each grade and subject.
- Each student is only assessed in one subject area.
- Students only take a small portion of the assessment
- Accommodations are provided as necessary for students with disabilities and English language learners.

## NAEP Results

- The results of NAEP are released as The Nation's Report Card.
- The report card provides national, state, and district-level results, results for different demographic groups, inclusion information, and sample questions.
- NAEP Results are reported in two formats
- Average Scale Scores
- Numeric scale
- 0-500 on mathematics and reading assessments
- Scores cannot be compared across content areas
- Achievement Levels
- Categorical scale
- Below Basic, Basic, Proficient, Advanced

## Grade 4

Mathematics Results

## Grade 4 Mathematics Results

- A notable achievement for Houston is that the Asian, Black, Hispanic, White, and free/reduced price lunch student groups in $4^{\text {th }}$ grade demonstrated higher average scores than similar student groups in the nation's public schools and public schools in large cities.
- In 2013, the percentage of students in HISD who performed at or above Basic was $80 \%$. This was greater than public schools in large cities at 75\%.
