

INFORMATION ITEM

MEMORANDUM

October 31, 2007

TO: Board Members

FROM: Abelardo Saavedra, Ph.D.
Superintendent of Schools

SUBJECT: **ASSESSMENT OF STUDENT PERFORMANCE IN MAGNET PROGRAMS:
2006–2007**

CONTACT: Carla Stevens, Research and Accountability, 713-556-6700

Attached is a copy of the Assessment of Student Performance in Magnet Programs report for students who were enrolled in Magnet programs for the 2006–2007 school year. The report presents results for the TAKS, Stanford 10, and Aprenda 3 examinations for all students served in a particular school's Magnet program. The data are disaggregated for the three types of Magnet programs: School-Within-A-School (SWAS), Add-on Program (AOP), and Separate and Unique School (SUS). This report includes all English or Spanish TAKS data available for magnet students, both Special Education and non-Special Education students, and all student data on the Stanford and Aprenda tests.

For 2007, the total number of students enrolled in AOP, SUS, and SWAS Magnet programs increased from 2006. The number of students in SWAS magnet programs increased for TAKS participation and decreased for Stanford 10 and Aprenda 3 participation from 2006. For students in schools with add-on programs or separate and unique schools serving all students on the campus, the number participating in TAKS, Stanford 10, and Aprenda 3 all decreased from 2006 to 2007. Scores for students enrolled in all types of magnet programs were higher than the district averages on all subtests on the TAKS, Stanford 10, and Aprenda 3.

ASSESSMENT OF STUDENT PERFORMANCE IN MAGNET PROGRAMS

2006–2007

Introduction

The HISD Magnet Program is designed and implemented to meet two objectives: a) to provide academic programs whose quality and special focus will attract students to them voluntarily from across the district, and b) to increase the percentage of students attending integrated schools. More broadly, the Magnet Program is the primary vehicle through which the district offers educational choice to students and their parents.

HISD currently sponsors three types of Magnet programs: Add-On Program (AOP), School-Within-a-School (SWAS), and Separate and Unique School (SUS). **Drawing 1** lists the types of HISD Magnet programs. AOP Magnet programs are structured to serve all students at a given campus with a particular academic component which has been “added-on” to the standard curriculum. SWAS Magnet programs are structured to serve a select group at a given campus by providing a distinct academic curriculum.

Drawing 1: HISD Magnet Programs

SUS Magnet programs are the five high schools and three combined schools offering specific academic curricula to the entire campus to which all students must apply for enrollment: DeBakey High School for Health Professions, the High School for Law Enforcement and Criminal Justice, the High School for the Performing and Visual Arts, Barbara Jordan High School for Careers, and Carnegie Vanguard High School, as well as the Contemporary Learning Center which serves at-risk students in grades 6–12 and The Rice School and T.H. Rogers which serve students in grades K–8. For the purposes of this report, the results from the SUS programs have been aggregated with those of the AOP programs at the regional level and districtwide.

Three enrollment procedures are employed by HISD Magnet programs: pre-admission testing or audition; pre-admission identification as potentially gifted or talented in intellectual ability, creativity, or leadership; and enrollment on the basis of available space. Students must be qualified for participation in a magnet program. The qualification procedures vary from program to program. A complete listing of schools by program type along with the Magnet specialty is presented in a table following this report.

HISD's Assessment Regimen

This report analyzes the performance of HISD Magnet students on three assessment instruments: the Texas Assessment of Knowledge and Skills (TAKS), the Stanford Achievement Test Series Tenth Edition (Stanford 10), and the Aprenda 3: La prueba de logros en español (Aprenda 3).

The TAKS is a state-mandated, criterion-referenced test used as a means to monitor student performance. The English-language version measures academic achievement in reading at grades 3–9, English Language Arts at grades 10 and 11, mathematics at grades 3–11, writing at grades 4 and 7, social studies in grades 8, 10, and 11, and science in grades 5, 8, 10, and 11. The Spanish-language version measures the performance of students in reading and mathematics in grades 3–6, writing in grade 4, and science in grade 5.

The Stanford 10 is a norm-referenced achievement test used to assess the level of learning that has taken place as a result of exposure to specific learning experiences and an educational environment. The following subtests on the Stanford 10 are included in this report: reading, mathematics, language, science, and social sciences for grades 3–11.

The Aprenda 3 represents the high state in the evolution of Spanish-language academic achievement measures. Modeled after its companion, the Stanford 10, and developed by Hispanic educators, Aprenda 3 is the most culturally inclusive Spanish-language assessment of academic standards. It is based on the latest national norms (2004), and expanded beyond the scope of previous editions to include science and social studies.

The construction of the Aprenda 3 was aligned with the content measured by the Stanford Achievement Test Series (specifically, the Stanford 10), and the Aprenda 3 was manufactured to meet the needs of students receiving most of their instruction in Spanish at all grade levels, K–12. Although parallel in content to the Stanford 10, Aprenda 3 is not a translation. Subtests in the following academic areas were included in the Aprenda 3 in order to provide a complete assessment of educational achievement: reading, language, mathematics, listening, science, and social science. For all subtests, except *Calculos Matematicos* (Mathematics Computation), test items were developed entirely in Spanish in order to ensure a non-biased test construction process. The *Calculos Matematicos* subtest, which contains only numerals, was taken directly from the Stanford Achievement Test Series in order to provide a statistical link between the two batteries.

Student Participation

Magnet students in SWAS programs were identified using the end-of-year School Administrative Student Information (SASI) supplemental files for 2005–2006 and end-of-year Chancery Student Management Solutions for 2006–2007. Students in AOP and SUS programs were identified using end-of-year SASI student master files for 2005–2006 and end-of-year Chancery Student Management Solutions for 2006–2007. All Magnet students, including Special Education and Limited English Proficient (LEP) students with valid test results from 2006–2007, were included in this analysis.

To determine the level of participation of Magnet students in the HISD testing regimen, the number of students tested was collected and analyzed by grade and test. The data are presented by school, region, and districtwide. For the 2006–2007 school year, there were 50 different magnet programs located on 105 campuses.

Analysis

Two years of results were analyzed for the district as a whole, as well as data for the regions and campuses for the appropriate grades. For the TAKS, the results from the Spring 2006 and 2007 administrations were reported in terms of the percentage of students who met the state's passing standard, which was set at panel recommendation. 2006 marked the first year for the administration of grade 8 science, and the passing standard was set at 2 SEM below the panel's recommendation, and for 2007, the passing standard was set at 1 SEM. Given that third and fifth grade students have multiple opportunities to take and pass reading and math, the data from the first administration were used.

For Stanford 10 and the Aprenda 3, the data are from the Spring 2006 and Spring 2007 administrations. Results reported are the National Percentile Rank (NPR) in 2006 and Normal Curve Equivalent (NCE) for both years. NPR indicates the relative academic standing of a student or group of students with other students or groups of students in the same grade for the same administration of a test. In order to compare student performance across different administrations of these tests and/or different grades, NPR data are converted into NCE scores. However, the comparison of student performance on the Stanford 10 with that of the Aprenda 3 is not appropriate with either NPR or NCE data.

Results for Students in Magnet Programs

The numbers of students enrolled in AOP, SUS, and SWAS Magnet programs who were tested during the 2005–2006 and 2006–2007 school years are presented in **Table 1**. These data represent the total number of students in grades 3–11 that were administered the English or Spanish TAKS during the spring of each school year as well as the total number of students in grades 1–11 that were administered the Stanford 10 or the Aprenda 3 in Spring 2006 and Spring 2007.

Table 1: The number of HISD Students Enrolled in SWAS and AOP/SUS Magnet Programs Who Took English or Spanish TAKS, Stanford, or Aprenda in Spring 2006 or 2007

Magnet Program	<u>TAKS</u>		<u>Stanford</u>		<u>Aprenda</u>		<u>Enrollment</u>	
	2006	2007	2006	2007	2006	2007	2006	2007
SWAS	11,171	11,357	16,112	15,838	559	550	16,751	16,855
AOP/SUS	6,687	6,269	15,300	14,560	2,127	2,051	18,108	18,207

- The number of students in SWAS magnet programs increased in 2007 for TAKS participation as compared with 2006 and decreased for Stanford 10 and Aprenda 3 participation. The number of students who were in AOP/SUS Magnet programs and who took the TAKS, Stanford 10, and

Appendix 3 decreased in 2007 from 2006. Enrollment in both SWAS and AOP/SUS magnet programs increased from 2006 to 2007.

The following discussion will compare the performance of students in AOP or SUS programs to those in SWAS programs on the TAKS and the Stanford by subject: reading, mathematics, writing, and science only since there are currently no magnet programs in HISD in the area of social studies. The figures present two years of data for each program by grade and include districtwide passing rates for all students for further reference and comparison. The measure from TAKS is the percentage of all students passing from the English and Spanish versions and from Stanford is the normal curve equivalent for all students. Results from the Appendix 3, TAKS grade 8 science, and the remaining TAKS and Stanford subtests are presented in the tables at the end of this report.

Reading

TAKS

Figures 1–3 present the percentage of students in grades 3–5, grades 6–8, and grades 9–11, respectively, who passed the 2006 and 2007 TAKS reading test by Magnet program type. The district's 2007 performance for all students is provided below the graph for reference.

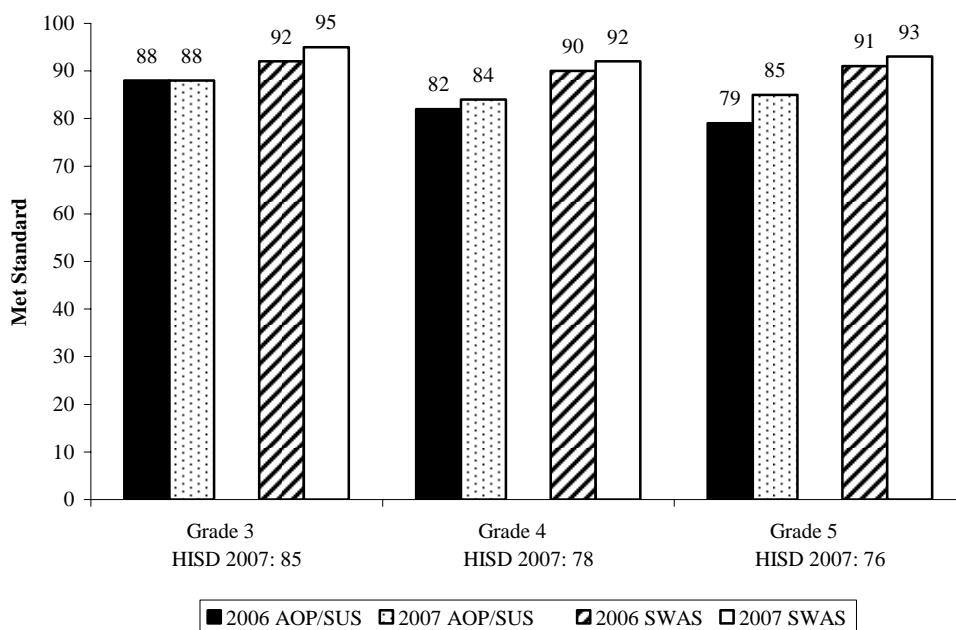

Figure 1: The percent of students in grades 3–5 from AOP/SUS and SWAS magnet programs who passed the TAKS reading test with HISD percent passing for comparison, Spring 2006 and Spring 2007.

- On the 2007 administration of the TAKS reading test, students in grades 3–5 AOP/SUS and SWAS Magnet programs had higher passing rates than the passing rates of their respective grade-level counterparts districtwide.

- On the 2007 administration of the TAKS reading test, students in grade 3 AOP/SUS Magnet programs had the same passing rates as did their counterparts in 2006. Elementary students in SWAS programs and students in grades 4 and 5 AOP/SUS programs reported higher passing rates than in 2006.
- On the 2007 administration of the TAKS reading test, SWAS reading passing rates ranged from 7 to 8 percentage points higher than AOP/SUS passing rates at the elementary school level.

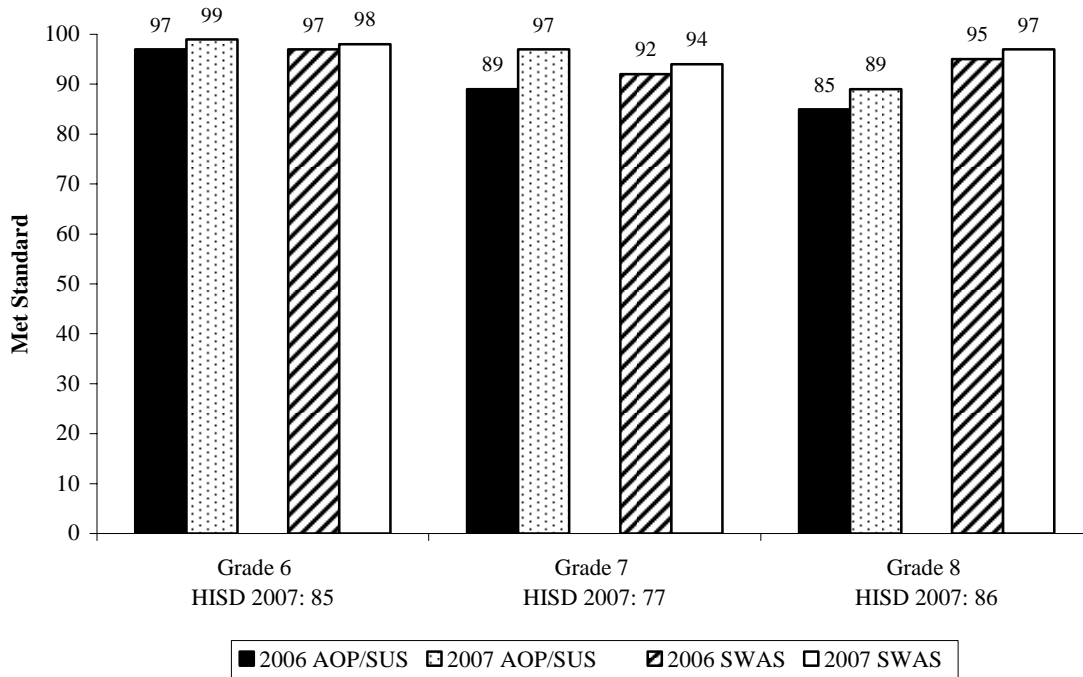

Figure 2: The percent of students in grades 6–8 from AOP/SUS and SWAS magnet programs who passed the TAKS reading test with HISD percent passing for comparison, Spring 2006 and Spring 2007.

- On the 2007 administration of the TAKS reading test, students in grades 6–8 AOP/SUS and SWAS Magnet programs had higher passing rates than the passing rates of their respective grade-level counterparts districtwide.
- In 2007, students in grades 6–8 from both SWAS and AOP/SUS Magnet programs had passing rates that were higher than the passing rates of their counterparts in 2006 on the TAKS reading test.
- On the 2007 administration of the TAKS reading test, AOP/SUS reading passing rates were higher than SWAS passing rates for students in grades 6 and 7, while SWAS reading passing rates were higher for students in grade 8.

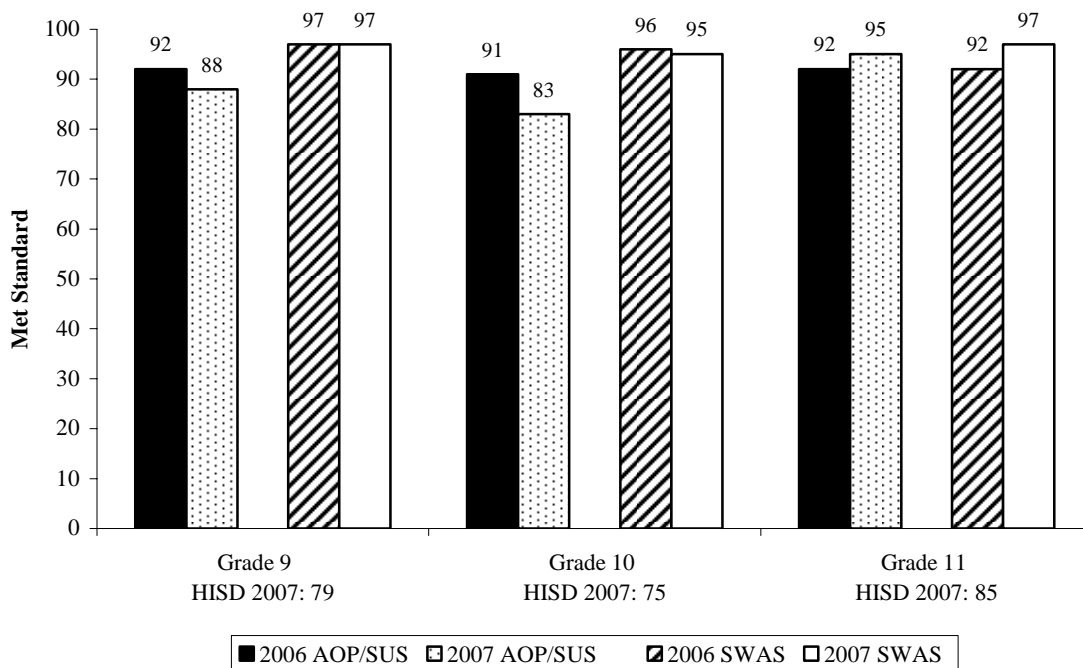

Figure 3: The percent of students in grades 9–11 from AOP/SUS and SWAS magnet programs who passed the TAKS reading test with HISD percent passing for comparison, Spring 2006 and Spring 2007.

- On the 2007 administration of the TAKS reading test, students in grades 9–11 AOP/SUS and SWAS Magnet programs had higher passing rates than the passing rates of their respective grade-level peers districtwide.
- In 2007, students in grades 9 and 10 from AOP/SUS and grade 10 SWAS Magnet programs had lower passing rates than the passing rates of their counterparts in 2006, and grade 11 students in both types of magnet programs reported higher passing rates than did their counterparts in 2006.
- On the 2007 administration of the TAKS reading subtest, SWAS reading passing rates were higher than AOP/SUS passing rates in grades 9 through 11.

Stanford

Figures 4–6 present the normal curve equivalent scores (NCE) of students in grades 1–5, 6–8, and 9–11, respectively, on the Spring 2006 and Spring 2007 Stanford 10 reading section by Magnet program type. The district's 2007 performance for all students is provided below the graph for reference.

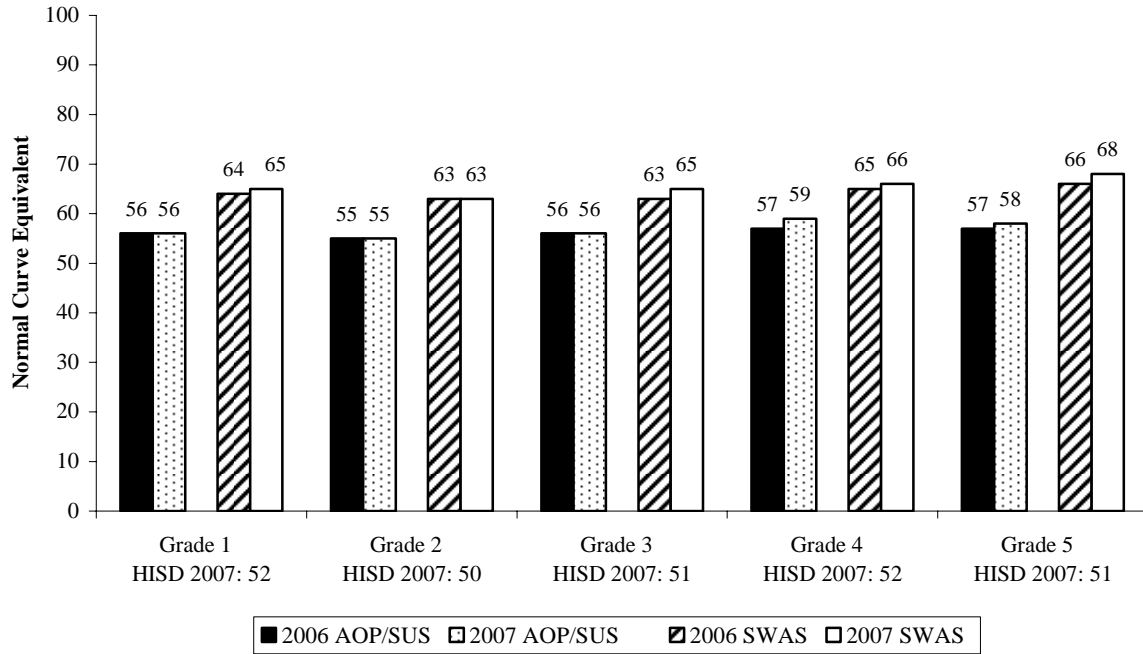

Figure 4: The normal curve equivalent scores of students in grades 1–5 from AOP/SUS and SWAS Magnet programs on the Stanford 10 reading subtest, Spring 2006 and Spring 2007.

- On the 2007 administration of the Stanford 10 reading subtest, students in grades 1–5 in both AOP/SUS and SWAS Magnet programs had normal curve equivalents that were higher than the normal curve equivalents for their respective grade-level peers districtwide.
- In 2007, students in both AOP/SUS and SWAS Magnet programs in grades 1–5 had normal curve equivalents on the Stanford reading subtest that were the same or higher than the 2006 normal curve equivalents.
- The greatest increase from 2006 to 2007 was 2 NCEs that occurred in the grades 3 and 5 for students in the SWAS programs and fourth graders in AOP/SUS programs.
- In 2007, elementary students in SWAS Magnet programs had higher passing rates on the Stanford 10 reading subtest than did their counterparts in AOP/SUS programs.

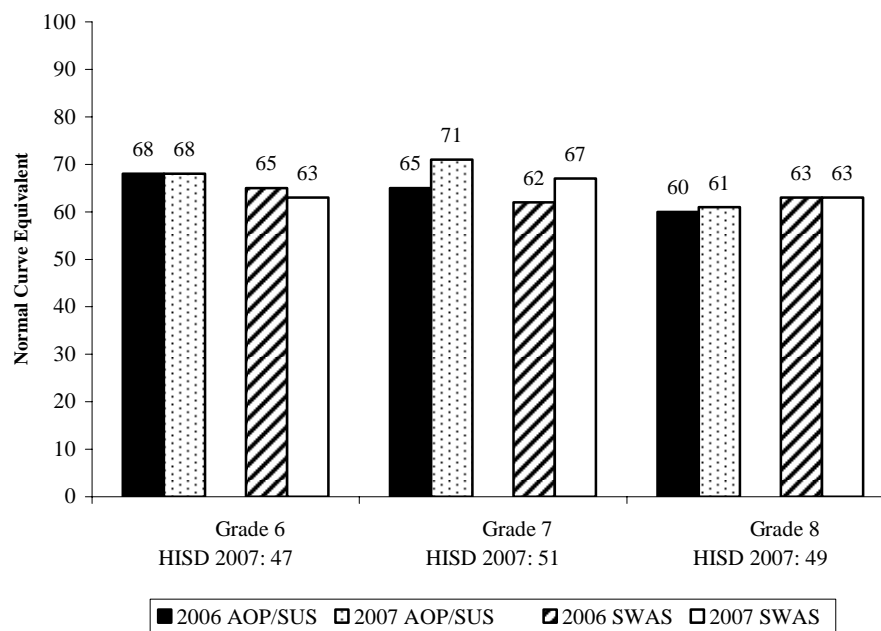

Figure 5: The normal curve equivalent of students in grades 6–8 from AOP/SUS and SWAS magnet programs on the Stanford 10 reading subtest, Spring 2006 and Spring 2007.

- On the 2007 administration of the Stanford 10 reading subtest, students in grades 6–8 in both AOP/SUS and SWAS Magnet programs had normal curve equivalents that were higher than the normal curve equivalents for their respective grade-level peers districtwide.
- In 2007, the normal curve equivalents were the same or higher than in 2006 for all grades in both SWAS and AOP/SUS Magnet programs, except for SWAS sixth graders whose reading scores declined by 2 NCEs.
- Students in grades 6 and 7 AOP/SUS Magnet programs reported higher NCEs for the 2007 Stanford reading test than did their SWAS counterparts, while grade 8 students in SWAS programs outperformed students in AOP/SUS programs.

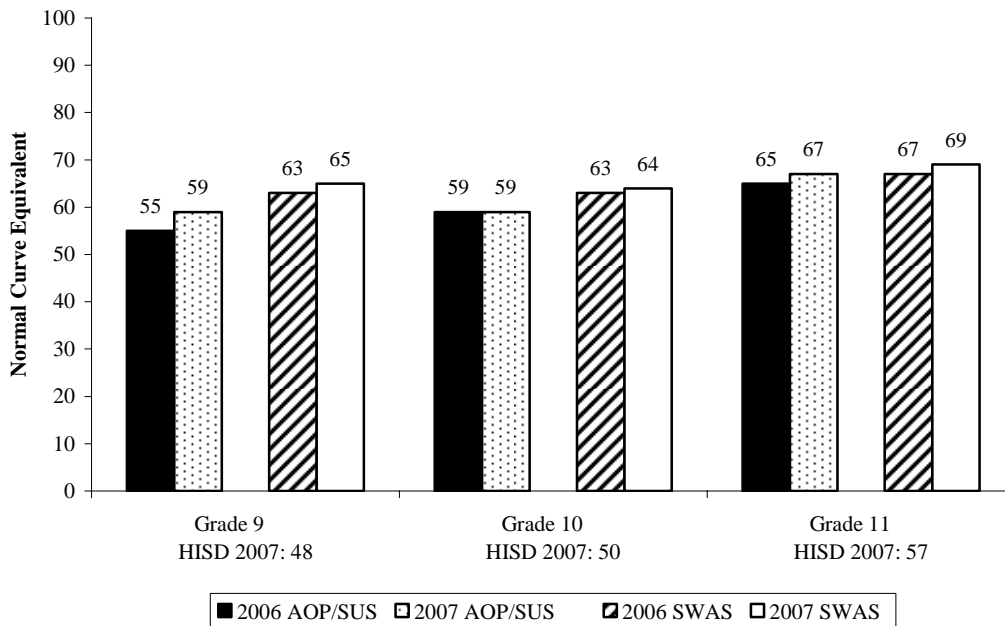

Figure 6: The normal curve equivalent of students in grades 9–11 from AOP/SUS and SWAS magnet programs on the Stanford 10 reading subtest, Spring 2006 and Spring 2007.

- On the 2007 administration of the Stanford 10 reading subtest, students in grades 9–11 in both AOP/SUS and SWAS Magnet programs had normal curve equivalents that were higher than the normal curve equivalents for their respective grade-level counterparts districtwide.
- In 2007, the normal curve equivalents on the reading subtest were higher than in 2006 for ninth and eleventh grade students in both AOP/SUS and SWAS Magnet programs and for tenth-grade SWAS students.
- Students in SWAS Magnet programs reported higher normal curve equivalents for the Stanford reading test in grades 9–11 in 2007 than did students in AOP/SUS Magnet programs.

Mathematics

TAKS

Figures 7–9 present the percentage of students in grades 3–5, 6–8, and 9–11, respectively, who met the minimum standard on the Spring 2006 and Spring 2007 TAKS mathematics test by Magnet program type. The district’s 2007 passing rates for all students are provided below the graph for reference.

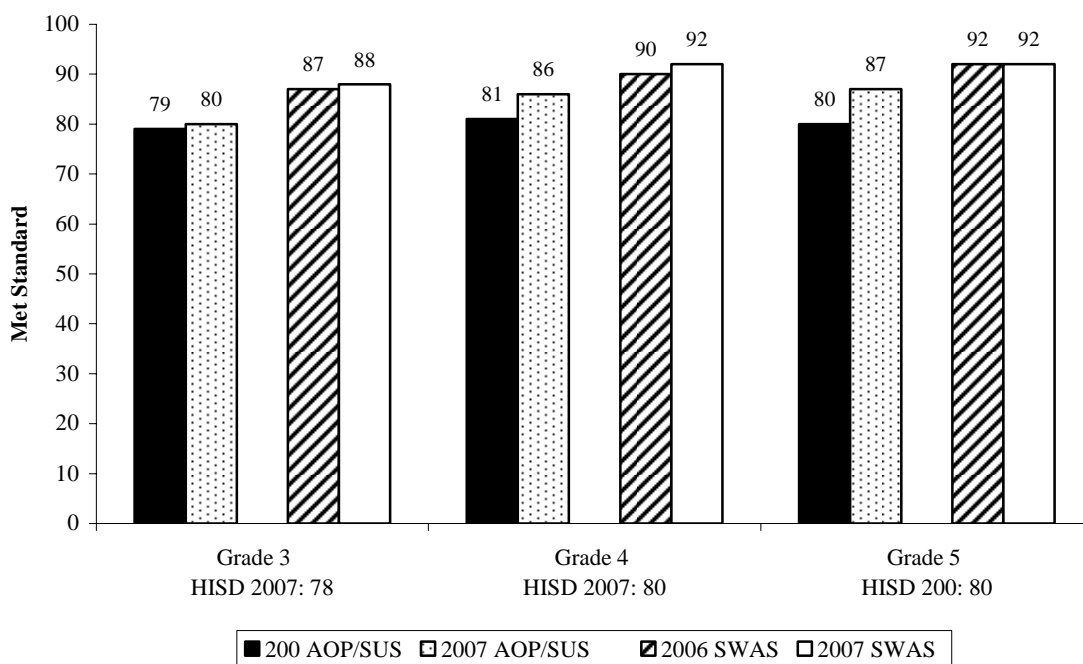

Figure 7: The percent of students in grades 3–5 from AOP/SUS and SWAS magnet programs who passed the TAKS mathematics test with HISD percent passing for comparison, Spring 2006 and Spring 2007.

- Results from the 2007 TAKS indicate that students in the AOP/SUS and SWAS Magnet programs in each of the grades 3–5 had higher passing rates on the mathematics test of the TAKS than their respective grade-level peers in the district.
- In 2007, SWAS mathematics passing rates ranged from 5 to 8 percentage points higher than AOP/SUS scores in grades 3–5.
- Students in grades 3–5 in both AOP/SUS and SWAS Magnet programs reported the same or higher passing rates on the 2007 mathematics test of the TAKS than their counterparts in 2006.

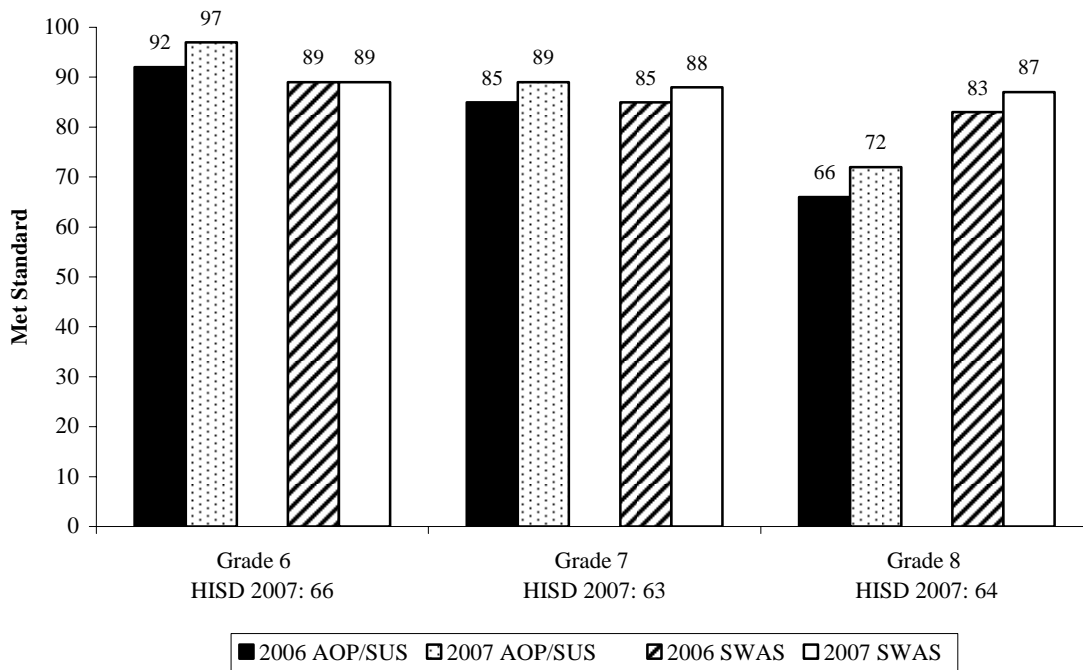

Figure 8: The percent of students in grades 6–8 from AOP/SUS and SWAS magnet programs who passed the TAKS mathematics test with HISD percent passing for comparison, Spring 2006 and Spring 2007.

- Results from the 2007 TAKS indicate that students in the AOP/SUS and SWAS Magnet programs in each of the middle school grades had higher passing rates on the mathematics test of the TAKS than their respective grade-level counterparts in the district.
- Students in grades 6–8 in both AOP/SUS and SWAS Magnet programs reported the same or higher passing rates on the 2007 TAKS mathematics test than their counterparts did on the 2006 TAKS, with the greatest increase of six percent occurring in grade eight AOP/SUS.
- In 2007, AOP/SUS mathematics passing rates were higher than SWAS passing rates for students in grade 6 and 7. Students in SWAS programs in the eighth grade had mathematics passing rates that were 15 percentage points higher than their counterparts in AOP/SUS programs.

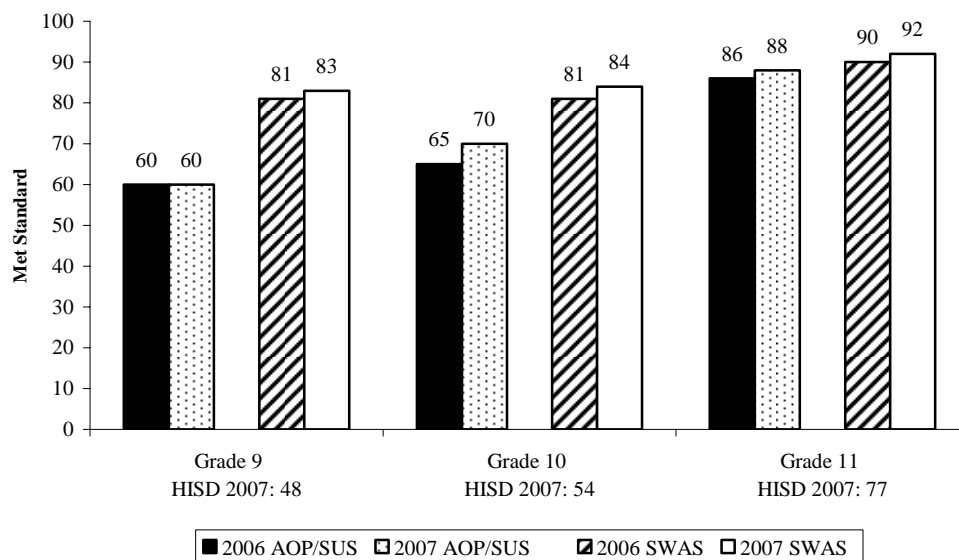

Figure 9: The percent of students in grades 9–11 from AOP/SUS and SWAS magnet programs who passed the TAKS mathematics test with HISD percent passing for comparison, Spring 2006 and Spring 2007.

- Results from the 2007 TAKS indicate that students in the AOP/SUS and SWAS Magnet programs in each of the high school grades had higher passing rates on the mathematics test of the TAKS than their respective grade-level peers in the district.
- Students in grades 9 through 11 in both AOP/SUS and SWAS Magnet programs reported the same or higher passing rates on the 2007 TAKS mathematics test than did their counterparts on the 2006 TAKS mathematics test.
- In 2007, SWAS mathematics passing rates ranged from 4 to 23 percentage points higher than AOP/SUS scores at the high school level.

Stanford

Figures 10–12 present the normal curve equivalent scores of students in grades 1–5, grades 6–8, and grades 9–11, respectively, on the Spring 2006 and Spring 2007 Stanford 10 mathematics subtest by Magnet program type. The district's 2007 performance for all students is provided below the graph for reference.

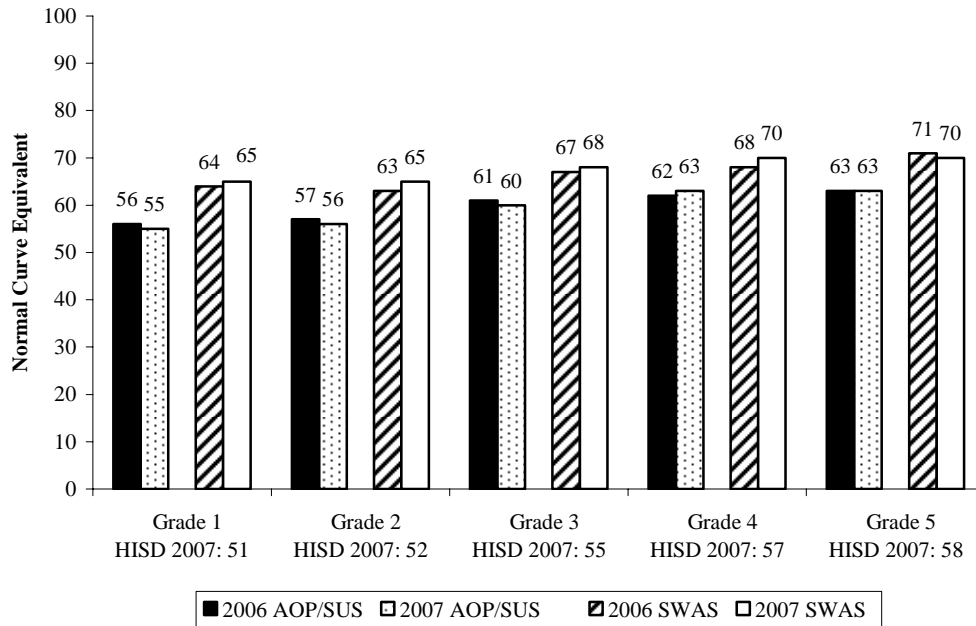

Figure 10: The normal curve equivalent of students in grades 1–5 from AOP/SUS and SWAS magnet programs on the Stanford 10 mathematics subtest, Spring 2006 and Spring 2007.

- On the 2007 administration of the Stanford 10 mathematics subtest, students in grades 1–5 in both AOP/SUS and SWAS Magnet programs had normal curve equivalents that were higher than the normal curve equivalents for their respective grade-level counterparts districtwide.
- The normal curve equivalents for 2007 indicate that students in grade 4 AOP/SUS and grades 1 through 4 SWAS Magnet programs experienced an increase from 2006. All other elementary magnet programs remained the same or decreased by one point during this one-year span.
- In 2007, students in the SWAS Magnet programs had normal curve equivalents that were higher than students in AOP/SUS Magnet programs.

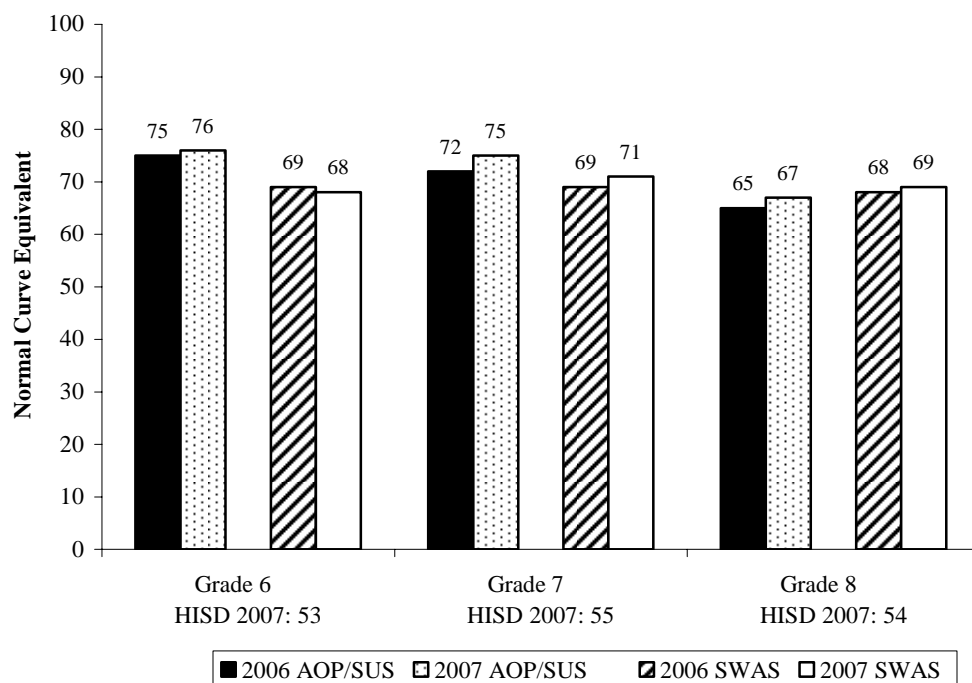

Figure 11: The normal curve equivalent of students in grades 6–8 from AOP/SUS and SWAS magnet programs on the Stanford 10 mathematics subtest, Spring 2006 and Spring 2007.

- On the 2007 administration of the Stanford 10 mathematics subtest, students in grades 6–8 in both AOP/SUS and SWAS Magnet programs had normal curve equivalents higher than the normal curve equivalents for their respective grade-level peers districtwide.
- The normal curve equivalents for the 2007 Stanford mathematics test indicate that students in grades 6–8 AOP/SUS Magnet programs experienced an increase from 2006. NCE scores for students in grades 7 and 8 SWAS Magnet programs also increased in 2006.
- In 2007, students in the AOP/SUS Magnet programs in grades 6 and 7 had normal curve equivalents that were higher than their counterparts in SWAS Magnet programs.

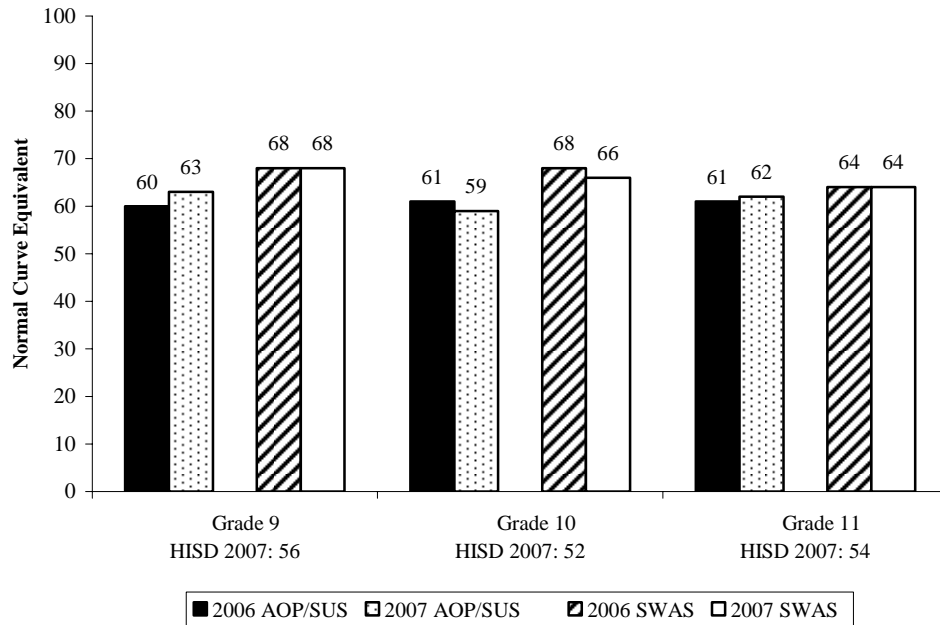

Figure 12: The normal curve equivalent of students in grades 9–11 from AOP/SUS and SWAS magnet programs on the Stanford 10 mathematics subtest, Spring 2006 and Spring 2007.

- On the 2007 administration of the Stanford 10 mathematics subtest, students in grades 9–11 in both AOP/SUS and SWAS Magnet programs had normal curve equivalents higher than the normal curve equivalents for their respective grade-level counterparts districtwide.
- The normal curve equivalents for 2007 indicate that ninth and eleventh grade students in both AOP/SUS and SWAS Magnet programs remained the same or increased from 2006. Both AOP/SUS and SWAS tenth graders reported a two-point decrease over the same time period.
- In 2007, students in the SWAS Magnet programs had mathematics normal curve equivalents that were higher than students in AOP/SUS Magnet programs.

Writing

TAKS

Figure 13 presents the percentage of students in grades 4 and 7 who passed the Spring 2006 and Spring 2007 TAKS writing test by Magnet program type. The district's 2007 passing rates for all students are provided below the graph for reference.

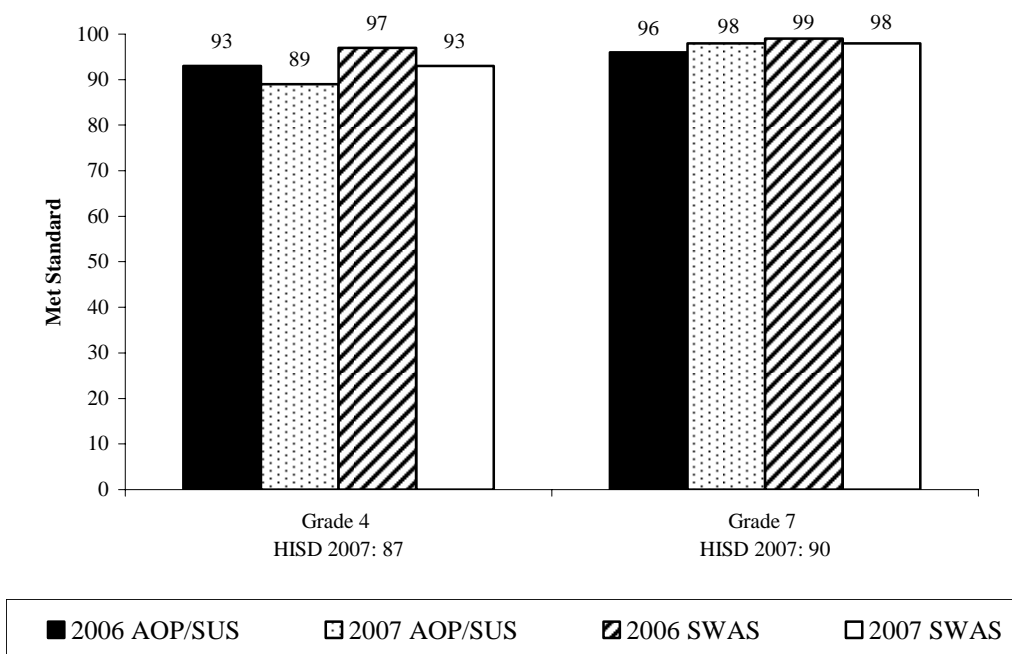

Figure 13: The percent of students in grades 4 and 7 from AOP/SUS and SWAS magnet programs who passed the TAKS writing test with HISD percent passing for comparison, Spring 2006 and Spring 2007.

- On the 2007 administration of the TAKS writing subtest, students in grades 4 and 7 AOP/SUS and SWAS Magnet programs had higher passing rates than the passing rates of their respective grade-level peers districtwide.
- In 2007, students in grade 4 AOP/SUS and SWAS Magnet programs and grade 7 SWAS students reported lower passing rates for the TAKS writing test than did their counterparts in 2006.
- Students in grade 4 SWAS Magnet programs had passing rates that were higher than their counterparts in AOP/SUS Magnet programs. Passing rates on the TAKS writing test were the same in 2007, compared to 2006, for seventh-grade students in both types of magnet programs.

Science**TAKS**

Figure 14 presents the percentage of students in grades 5, 10, and 11 who passed the Spring 2006 and Spring 2007 TAKS science test by Magnet program type. The district's 2007 passing rates for all students are provided below the graph for reference.

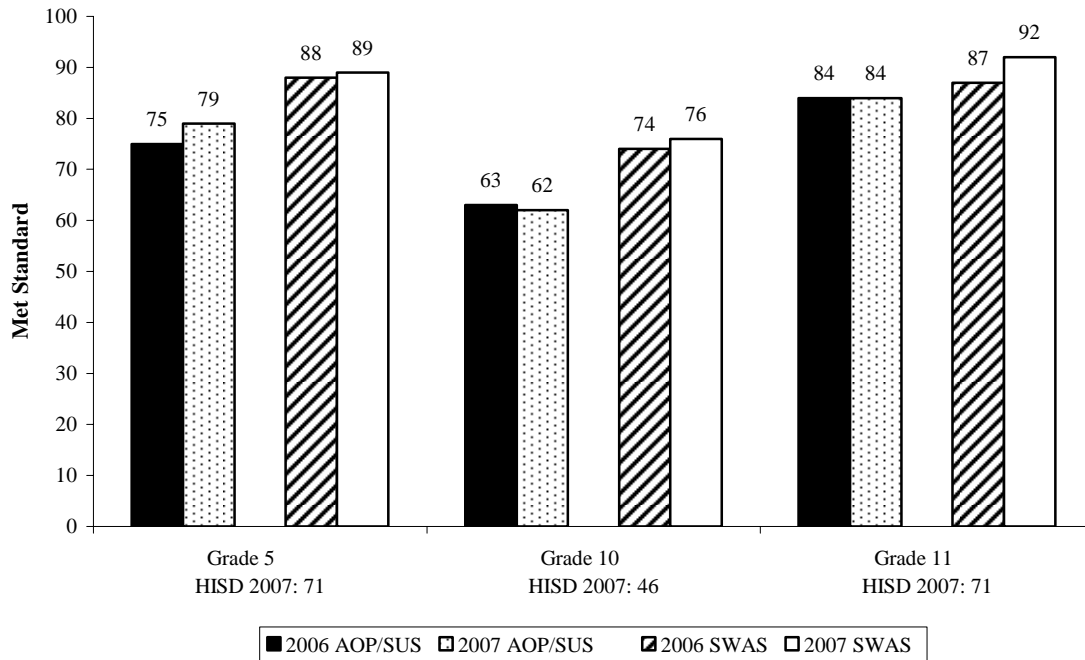

Figure 14: The percent of students in grades 5, 10, and 11 from AOP/SUS and SWAS magnet programs who passed the TAKS science test with HSD percent passing for comparison, Spring 2006 and Spring 2007.

Note: Since 2006 was the benchmark administration of the grade 8 science test, there are different passing standards for 2006 and 2007. Thus, the results were not presented in this chart but may be found in the tables following this report.

- On the 2007 administration of the TAKS science subtest, students in grades 5, 10, and 11 AOP/SUS and SWAS Magnet programs had higher passing rates than the passing rates of their respective grade-level counterparts districtwide.
- Students in grades 5, 10, and 11 in SWAS Magnet programs and grade 5 APO/SUS students reported higher passing rates on the 2007 TAKS science test than their counterparts in 2006. Students in grade 10 AOP/SUS Magnet programs reported lower passing rates than did their 2006 counterparts, while AOP/SUS eleventh graders' scores remained the same.
- On the 2007 TAKS science test, students in the SWAS Magnet programs had passing rates that were higher than students in AOP/SUS Magnet programs for all grades tested.

Stanford

Figures 15–17 present the normal curve equivalent scores of students in grades 1–5, grades 6–8, and grades 9–11, respectively, on the Spring 2006 and Spring 2007 Stanford 10 environment/science subtest by Magnet program type. The environment subtest is the science-related and social science-related subtest that is given to grades 1–2, while the science and social science subtests are given separately to students in grades 3–11. The district’s 2007 performance for all students is provided below the graph for reference.

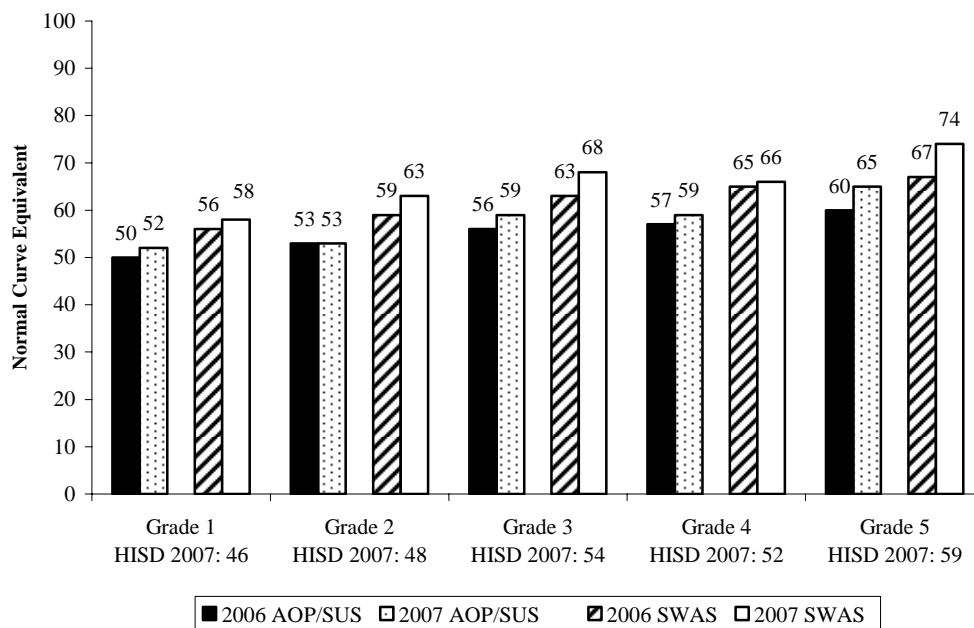

Figure 15: The normal curve equivalent of students in grades 1–5 from AOP/SUS and SWAS magnet programs on the Stanford 10 environment/science subtest, Spring 2006 and Spring 2007.

- On the 2007 administration of the Stanford 10 environment/science subtest, students in grades 1–5 AOP/SUS and SWAS Magnet programs had higher normal curve equivalents than the normal curve equivalents of their respective grade-level counterparts districtwide.
- Students in AOP/SUS and SWAS Magnet programs had 2007 Stanford environment/science subtest normal curve equivalents which were the same or higher than the 2006 results in grades 1 through 5. The greatest gains were reported by SWAS fifth graders with an increase of 7 points.
- Elementary students in the SWAS Magnet programs had normal curve equivalents that were higher than students in AOP/SUS Magnet programs for the 2007 Stanford environment/science subtest.

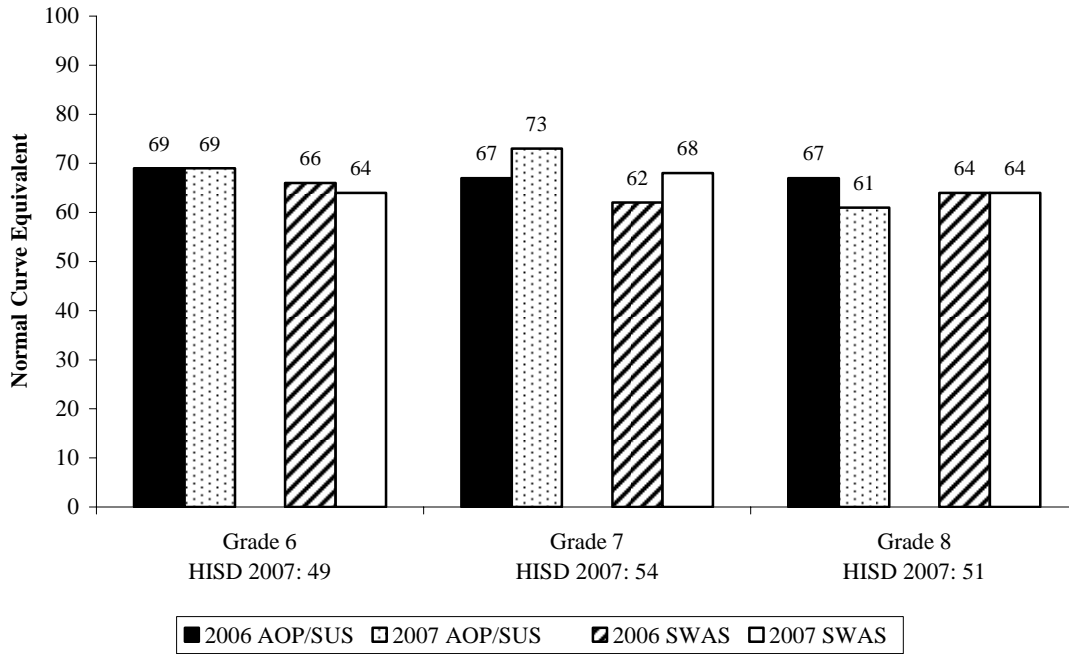

Figure 16: The normal curve equivalent of students in grades 6–8 from AOP/SUS and SWAS magnet programs on the Stanford 10 science subtest, Spring 2006 and Spring 2007.

- On the 2007 administration of the Stanford science subtest, students in grades 6–8 in both AOP/SUS and SWAS Magnet programs had normal curve equivalents higher than the normal curve equivalents for their respective grade-level peers districtwide.
- Students in grade 7 in both AOP/SUS and SWAS Magnet programs reported higher 2007 Stanford science subtest normal curve equivalents than did their 2006 counterparts. AOP/SUS sixth graders and SWAS eighth graders remained the same, while SWAS sixth graders' and AOP/SUS eighth graders' scores declined from 2006.
- Students in grades 6 and 7 in the AOP/SUS Magnet programs had normal curve equivalents that were higher than their counterparts in SWAS Magnet programs, while eighth graders in SWAS programs outscored their grade-level peers in AOP/SUS programs.

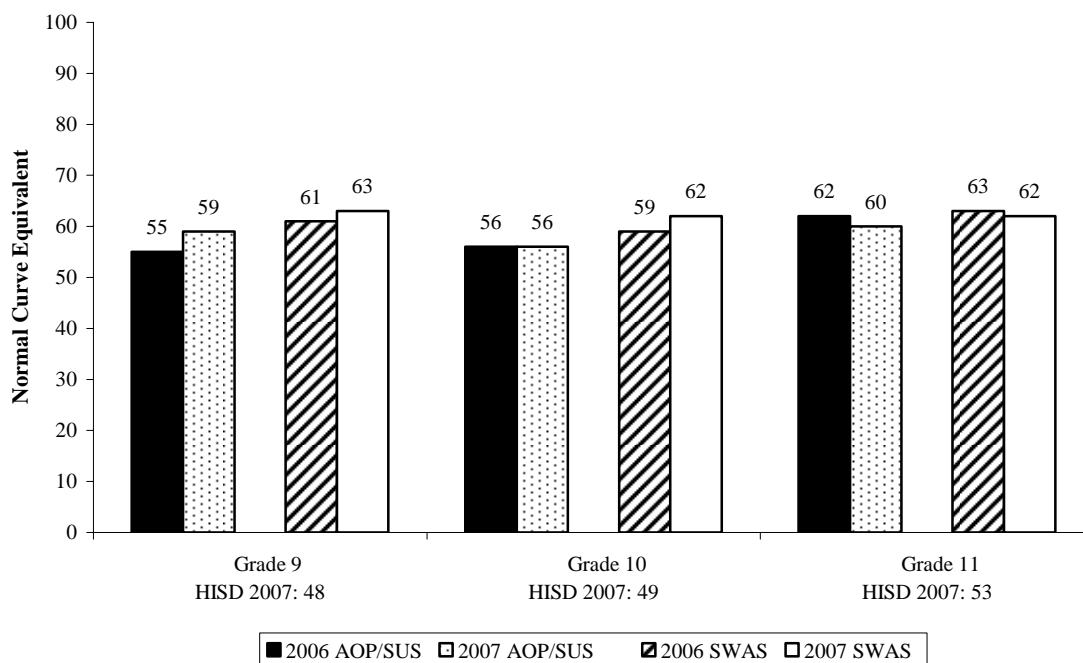

Figure 17: The normal curve equivalent of students in grades 9–11 from AOP/SUS and SWAS magnet programs on the Stanford 10 science subtest, Spring 2006 and Spring 2007.

- On the 2007 administration of the Stanford science subtest, students in grades 9–11 in both AOP/SUS and SWAS Magnet programs had normal curve equivalents that were higher than the normal curve equivalents for their respective grade-level counterparts districtwide.
- Students in grades 9 and 10 in both AOP/SUS and SWAS Magnet programs had 2007 Stanford science subtest normal curve equivalents that were the same or higher than the 2006 results.
- For the 2007 Stanford 10 science subtest, students in the SWAS Magnet programs had normal curve equivalents that were higher than those of students in AOP/SUS Magnet programs in grades 9 through 11.

Discussion

The 2006–2007 school year was the fourth administration of the Texas Assessment of Knowledge and Skills (TAKS) test that replaced the previous Texas Assessment of Academic Skills test. The new assessment system is more rigorous and comprehensive than earlier versions of the state’s system. Also, 2006–2007 represents the fourth year of Stanford 10.

Results from the 2007 TAKS and the 2007 Stanford 10 indicate that students in the AOP/SUS and SWAS Magnet programs in all grades had higher passing rates on the reading, mathematics, writing, and science subtests of the assessments than did their respective grade-level counterparts districtwide.
