FROM: Millard L. House II
Superintendent of Schools
SUBJECT: PSAT ASSESSMENT REPORT, 2021
CONTACT: Allison Matney, Ed.D., 713-556-6700
This report analyzes the participation and performance of Houston Independent School District (HISD) students who took the fall and spring administration of the PSAT 8/9 or took the 2021 administration of the Preliminary SAT/National Merit Scholarship Qualifying Test (PSAT/NMSQT) offered by the College Board.

Key findings include:

- For 2021, PSAT/NMSQT participation rates for tenth and eleventh grade students were comparable to 2019 pre-pandemic levels. For eighth and ninth grade students in 2021, participation rates dropped by 5 percentage points compared to 2019.
- Average PSAT 8/9 and PSAT/NMSQT scores and scores by subject and grade level districtwide are lower than those of students in Texas and the total group (international and national testers).
- Average mathematics scores were higher than average Evidenced-based reading and writing (ERW) scores on the 2021 PSAT $8 / 9$ for eighth grade students districtwide. A similar trend is evident for the state.
- For eleventh grade students tested on the PSAT/NMSQT, average ERW scores were higher than average mathematics scores for the district, state, and total group.
- A higher percentage of HISD eighth and ninth grade students who took the PSAT 8/9 met the CCR benchmark for ERW ( 40 percent and 37 percent, respectively) compared to mathematics ( 26 percent and 24 percent, respectively). A similar trend is evident for both the state and total group.
- A higher percentage of HISD tenth and eleventh grade students who took the PSAT/NMSQT met the CCR benchmark in ERW (45 percent and 44 percent, respectively) compared to mathematics ( 24 percent and 21 percent, respectively) in 2021. A similar trend is evident for both the state and total group.
- For 2021, at-risk students scored lower on average than all students and all student groups for all PSAT assessments. Moreover, for all grade levels and assessments, only 7 percent of at-risk students met both CCR benchmarks.

## Administrative Response 2022

## College Readiness

The district is committed to providing access to opportunities for students, offering the full SAT suite of assessments comprised of the following: PSAT 8/9, PSAT/NMSQT, and the School Day SAT. The purpose of offering the full suite of assessments is to provide students an opportunity to take a grade-level SAT that establishes a college-ready baseline in eighth grade, thereby identifying gaps in learning. In grades $9-11$, students will have the opportunity to improve their skills in reading, writing, and math to meet the college readiness benchmark prior to high school graduation. Access to the PSAT/NMSQT is very important, as it is the qualifying exam for the National Merit Scholarship program. The final step in the SAT suite of assessments is the school day SAT, which ensures that all students in the district have access to an assessment that is required by many colleges and universities for admission and/or scholarships, and an opportunity to meet TSI college ready benchmarks.

While our goal for 2021-2022 was to increase participation and success with the PSAT, COVID did impact last year's test participation. The PSAT (which is proctored in mid-October each year) was the first district wide assessment given after students returned from the virtual learning option. Although back in school, students, teachers, and central office staff members were still being impacted by COVID. Several College Readiness and Post-Secondary Programming staff members were on campuses in classrooms supporting students due to quarantines and vacancies. This reduced their capacity to support campuses in college readiness work as they had in the past. In addition, during the weeks leading up to the fall PSAT, campuses were focused on ensuring they had coverage for vacancies and quarantined teachers. Finally, many students during the first two months of school were quarantined due to having or being exposed to COVID.

Official SAT Practice at Khan Academy is at the forefront of the district's initiative to prepare students for PSAT and SAT exams. College Board research indicates that students who use Official SAT Practice at Khan Academy for at least 20 hours see, on average, a 115-point score increase. The College Readiness Department purchased the Khan District Dashboard for all high schools which allows school and district leaders to monitor student usage and skill attainment in Official SAT Practice Math and Reading. This tool allows school leaders to use data to create targeted supports that build skills and encourage usage. In the 2021-2022 inception year, 52,129 students had activated district Khan Academy Accounts. The College Readiness Department also created toolkits and trainings to support teachers and school leaders, including providing Teacher Super User Panels. Additionally, the College Readiness Department created incentive and promotional programs for students and schools to increase usage of Official SAT practice including, the Khanathalon and the You Khan Do It Laptop Giveaway. HISD students practiced a total of 5.5 million minutes in official SAT personalized practice. The College Readiness Department is committed to continue funding the Khan District Dashboard in 2022-2023 and building Official SAT Practice into all high schools' college-going culture.

As part of our October College, Career, and Military Month, HISD will be including several new activities to promote PSAT participation along with increasing scores. The College Readiness Department will supply each middle and high school a banner promoting the test date along with posters with testing tips and reasons for wanting to do well on the exam. Communications promoting the PSAT along with resources will go out to parents leading up to the exam. The

College Readiness Department will provide back-to-school information sessions (virtual and in-person) regarding the PSAT, AP, and dual-credit opportunities.

The College Readiness Department in conjunction with school counselors will provide two PSAT workshops. In the spring students will receive their test book and scores back. In the fall all students will have a classroom presentation on the importance of the exam, resources to prepare for the exam, and benefits of doing well. The department will work with the Schools' Office to provide training on score interpretation and strategies to increase PSAT scores and participation to principals and Tier II leaders and with the Special Education and Multilingual departments to co-present to principals to ensure special populations who are eligible to take the PSAT are included.

The College Readiness Department will build out benchmarks for number and percent of students expected to test by campus. This will be both aggregate and disaggregated data given to campus principals and SSOs in September. College Readiness will build out a list of students who were within 50 points on the ELA and/or 50 points on the Math sections to being college ready the year before. School counselors and college advisors will be expected to have targeted conversations with these students, letting them know that as little as 6 hours on Khan Academy can raise their score by 39 points. The College Readiness Department will run benchmark data on Khan usage for these students and share with campus and district leadership.

Leading up to the 2022 school day PSAT, all AVID elective classes in the 16 middle and 21 AVID high schools will be expected to have dedicated time on the Khan Academy platform each week during their tutorial period. AVID elective class teachers will also review 2021 PSAT scores and set goals with their scholars.

Should you have any further questions, please contact Allison Matney in Research and Accountability at 713-556-6700.

## PSAT Assessment Report, 2021-2022

## Executive Summary

## Program Description

The Preliminary SAT for students in grades eight and nine (PSAT 8/9) and the Preliminary SAT/National Merit Scholarship Qualifying Test (PSAT/NMSQT) are national examinations offered by the College Board. These assessments measure progress toward college and career readiness.

## Highlights

- For 2021, PSAT/NMSQT participation rates for tenth and eleventh grade students were comparable to 2019 pre-pandemic levels. For eighth and ninth grade students, participation rates dropped by 5 percentage points.
- Average PSAT 8/9 and PSAT/NMSQT scores and scores by subject and grade level districtwide are lower than those of students in Texas and the total group (international and national testers).
- For 2021, Asian students scored higher on average than all students and all student groups for all PSAT assessments except on the PSAT $8 / 9$ where 81 percent of G/T ninth grade students compared to 80 percent of Asian students met Evidence-based reading and writing (ERW) College and Career Readiness (CCR) benchmarks.
- Average mathematics scores were higher than average ERW scores on the 2021 PSAT 8/9 for eighth grade students districtwide. A similar trend is evident for the state.
- For eleventh grade students tested on the 2021 PSAT/NMSQT, average ERW scores were higher than average mathematics scores for the district. A similar trend is evident for the state and total group.
- A higher percentage of HISD eighth and ninth grade students who took the PSAT 8/9 met the CCR benchmark for ERW (40 percent and 37 percent, respectively) compared to mathematics (26 percent and 24 percent, respectively). A similar trend is evident for both the state and total group.
- A higher percentage of HISD students who took the PSAT/NMSQT met the CCR benchmark in ERW ( 45 percent and 44 percent, respectively) compared to mathematics ( 24 percent and 21 percent, respectively) in 2021. A similar trend is evident for both the state and total group.
- For 2021, at-risk students scored lower on average than all students and all student groups for all PSAT assessments. Moreover, for all grade levels and assessments, only 7 percent of at-risk students met both CCR benchmarks.

## Introduction

The SAT Suite of Assessments is an integrated system of tests that includes the SAT ${ }^{\circledR}$ (for students in grades 11 and 12), the Preliminary SAT/National Merit Scholarship Qualifying Test (PSAT/NMSQT ${ }^{\circledR}$ for grades 10 and 11), the PSAT ${ }^{\text {TM }} 10$ (for grades 10), and the PSAT ${ }^{\text {тM }} 8 / 9$ (for grades 8 and 9 ). The tests measure the same skills and knowledge in grade-appropriate ways. The PSAT 8/9 establishes a baseline measurement of college and career readiness as students enter high school. The PSAT/NMSQT measures the skills and knowledge that research shows are the most essential for college and career readiness and success and can qualify eligible students for scholarships through partnership with the National Merit Scholarship Corporation. ${ }^{1}$

In 2015-2016, the College Board redesigned the PSAT/NMSQT and introduced the PSAT 8/9 and the PSAT 10. The goal of the redesign was to reflect what is taught in the classroom and assess skills that are the most accurate predictors of college and career readiness and success based on established research and evidence. Each assessment has two section scores, Evidence-Based Reading and Writing (ERW) and Math. The ERW Section Score is comprised of the Reading Test Score and the Writing and Language Test Score. The Math Section Score is comprised of the Math Test Score. The Reading Test measures comprehension and reasoning skills and focuses on close reading of passages in a wide array of subject areas. The Writing and Language Test measures a range of skills including command of evidence, expression of ideas, and the use of Standard English conventions in grammar and punctuation. The Math Test covers a range of math practices, with an emphasis on problem solving, modeling, using tools strategically, and using algebraic structure.

Each section score of the PSAT 8/9 ranges from 120 to 720 , with the total score ranging from 240 to $1440 .{ }^{2}$ For the PSAT 10 and the PSAT/NMSQT, each section score ranges from 160 to 760 , with the total score ranging from 320 to $1520 .{ }^{1,3}$ The score report includes an indicator for each section, ERW and Mathematics, which shows whether a student's score meets the grade-level benchmark. These benchmarks allow students and educators to understand how students are progressing toward college readiness.

This report analyzes the participation and performance of Houston Independent School District (HISD) students who took the fall 2021 administration of the PSAT 8/9 and the PSAT/NMSQT. All comparisons regarding participation on the tests reflect the newly designed PSAT suite of assessments. In addition, comparisons are made to the state and "total group" which includes all national and international testers.

## Results

## PSAT $8 / 9$ and PSAT/NMSQT Participation

HISD launched the PSAT for All initiative in 2003 to enroll more students in Advanced Placement courses and prepare them to be successful on the SAT. The district-wide initiative enables all HISD tenth graders to take the PSAT/NMSQT for free. Since 2010, the initiative has expanded to include grades $8-11$. Figures 1 and $\mathbf{2}$ (p. 3) illustrate district-wide PSAT participation. Participation was calculated by dividing the number of PSAT test-takers by the grade level enrollment. Even with expanded testing dates, COVID-19 negatively impacted participation rates across all grade levels on the PSAT Suite of Assessments in 2020. Therefore, 2020 data are not comparable to previous and subsequent years for this reason as well as changes to district policy.

- The number of ninth grade students tested increased compared to 2019, although participation decreased for other grade levels for the PSAT assessments taken in 2021 (Figure 1).
- For 2021, PSAT/NMSQT participation rates for tenth and eleventh grade students were comparable to 2019 pre-pandemic levels. For eighth and ninth grade students, participation rates dropped by 5 percentage points (Figure 2).

Figure 1. PSAT \# Participation by Grade, 2018-2021

Figure 2. PSAT \% Participation by Grade, 2018-2021

Sources: Figures 1 \& 2, HISD PSAT Assessment Report, 2020-2021; College Board PSAT 8/9 data file, 3/21/2022; College Board PSAT/NMSQT data file, 5/10/2022; Figure 2, Fall PEIMS Extract, 2021
Note: Due to the COVID-19 pandemic, 2020 data are not comparable to previous or subsequent years.

Figure 3 shows the HISD PSAT participation rate by demographic characteristics. Participation rates were determined by dividing the number of students within each demographic group who took the PSAT by the number enrolled by grade level within that demographic group.

- G/T and Asian students had the highest participation rates for all PSAT assessments.
- For the PSAT $8 / 9$ and the PSAT/NMSQT, White students had the lowest participation rates for all grade levels.

## PSAT Performance

Figures 4A-4C show the average total, ERW, and math scores, respectively, by grade level on the PSAT 8/9 comparing district, state, and total group (national and international) results.

Figures 4A-4C. Mean PSAT 8/9 Scores for District, State, and Total Group Students, 2021

4A. Grades 8 and 9 Mean Total Score PSAT 8/9

4B. Grades 8 and 9 Mean ERW Score PSAT 8/9

4C.Grades 8 and 9 Mean Mathematics Score PSAT 8/9

Sources: District, PSAT 8/9 datafile, 3/21/2022; State and Total Group, College Board PSAT 8/9 Scores and Benchmarks-8 ${ }^{\text {th }}$ and $9^{\text {th }}$ grade, 3/21/2022
Note: ERW=Evidence-based reading and writing; Total group includes international test takers.

- In 2021, the PSAT 8/9 mean total and subject scores districtwide were lower than state and worldwide average scores for grades eight and nine (Figures 4A-4C).
- Average mathematics scores were higher than average ERW scores on the 2021 PSAT 8/9 for eighth grade students districtwide. A similar trend is evident for the state.
- For the state and total group, average ERW scores were higher than average mathematics scores for ninth grade students in 2021.

Figures 5A-5C (p. 6) show the average total, ERW, and math scores, respectively, by grade level on the PSAT/NMSQT comparing district, state, and total group (national and international) results.

Figures 5A-5C. Mean PSAT/NMSQT Scores for District, State, and Total Group Students, 2021

5C.Grades 10 and 11 Mean Mathematics Scores

Sources: District, College Board PSAT/NMSQT data file, 5/10/2022; State and Total Group, College Board PSAT/NMSQT Scores and Benchmarks$10^{\text {th }}$ and $11^{\text {th }}$ grade, $5 / 12 / 2022$
Note: ERW=Evidence-based reading and writing; Total group includes international test takers.

- In 2021, the PSAT/NMSQT mean total and subject scores districtwide were lower than state and worldwide averages scores (Figures 5A-5C, p. 6).
- For tenth grade students tested on the PSAT/NMSQT, average ERW scores districtwide were lower than average mathematics scores, while there was no difference in average ERW scores compared to average mathematics scores statewide, and worldwide average mathematic scores exceeded average ERW scores.
- For eleventh grade students tested on the PSAT/NMSQT, average ERW scores were higher than average mathematics scores for the district, state, and total group.

Figures 6A-6C (pp. 7-8) show the district's average PSAT 8/9 total, ERW, and mathematics scores, respectively, by grade level and demographic characteristics for 2021.

- For eighth and ninth grade students tested on the PSAT 8/9, Asian students scored higher on average in both ERW and mathematics and on the mean total score compared to all students and all student groups (Figure 6A-6C).
- For eighth and ninth grade students tested on the PSAT 8/9, at-risk students scored lower on average in both ERW and mathematics and on the mean total score compared to all students and all student groups, followed by African American students.
- For eighth grade students tested on the PSAT 8/9, average mathematics scores were higher than average ERW scores for the district, African American, Hispanic, and at-risk students.
- For ninth grade students tested on the PSAT 8/9, average mathematics scores were higher than average ERW scores for Asian, Hispanic, and at-risk students, while average ERW scores surpassed average mathematics scores for African American, White, and G/T students as well as students identified as Two or more races.

Figures 6A-6C. Mean PSAT 8/9 Scores by Subject, Grade, and Demographics, 2021

6A. Grades 8 and 9 Mean Total Scores

Sources: Sources: District, PSAT 8/9 datafile, 3/21/2022; PEIMS Fall Snapshot, 2021 and Cognos Demographics
Note: ERW=Evidence-based reading and writing; Section scores may not add up to total score due to rounding. PEIMS Fall Snapshot and Cognos ethnicity were used because of the large percentage of No Responses in the PSAT file.

Figures 7A-7C (p. 9) show the average PSAT/NMSQT scores by subject, grade level, and demographic characteristics for the district for 2021.

- For tenth grade students tested on the 2021 PSAT/NMSQT, Asian students and students identifying as Two or more races scored higher on average in ERW, mathematics and on the total mean score compared to all other student groups. (Figure 7A-7C).
- For eleventh grade students tested on the 2021 PSAT/NMSQT, Asian and White students scored higher on average in ERW, mathematics, and on the total mean score compared to all other student groups.
- For grade 10, mean mathematics scores were higher for all students, African American, Hispanic, and at-risk students tested on the PSAT/NMSQT for 2021.
- For grade 11, mean ERW scores were higher for all students and all student groups on the 2021 PSAT/NMSQT compared to mean mathematics scores, with two exceptions, Hispanic students where the results were comparable, and at-risk students.

Figures 7A-7C. Mean PSAT/NMSQT Scores by Grade, and Demographics, 2021

PSAT College and Career Readiness (CCR) Benchmarks
The College Board sets benchmark scores to predict students' chance of success in college and career readiness. According to the College Board, ${ }^{4}$ the SAT mathematics benchmark is associated with a 75 percent chance of earning at least a C in first-semester, college-level courses in algebra, statistics, precalculus, or calculus. The SAT ERW benchmark is associated with a 75 percent chance of earning at least a C in first-semester, college-level courses in history, literature, social science, or writing. Score reports for the PSAT/NMSQT, PSAT 10, and PSAT 8/9 include grade-level benchmarks based on how students grow from year to year toward the SAT benchmarks.

Figures $\mathbf{8 A} \mathbf{A F}$ show the percentage of students from the district, state, and total group who met college and career readiness (CCR) benchmarks in ERW, mathematics, and both on the PSAT assessments.

Figures 8A-8C. Percentage of District, State, and Total Group Students Meeting PSAT 8/9 CCR Benchmarks, 2021

Note: ERW=Evidence-based reading and writing; Total group includes international test takers.

- A higher percentage of HISD eighth and ninth grade students who took the PSAT 8/9 met the CCR benchmark for ERW (40 percent and 37 percent, respectively) compared to mathematics ( 26 percent and 24 percent, respectively). A similar trend is evident for both the state and total group (Figures 8B8C, pp. 10-11).
- A lower percentage of eighth and ninth grade HISD students who took the PSAT 8/9 met both CCR benchmarks as well as CCR benchmarks by subject compared to the students from the state and total group (Figures 8A-8C, pp. 10-11).
- A higher percentage of tenth and eleventh grade HISD students who took the PSAT/NMSQT met the CCR benchmark in ERW (45 percent and 44 percent, respectively) compared to mathematics (24 percent and 21 percent, respectively) in 2021. A similar trend is evident for both the state and total group (Figures 8E- 8F, p. 13).
- A lower percentage of HISD students who took the PSAT/NMSQT met both CCR benchmarks as well as CCR benchmarks by subject compared to the students from the state and total group (Figures 8D8F, pp. 12-13).

Figures 9A-9F show the percentage of students who met the CCR benchmarks on the PSAT 8/9 and the PSAT/NMSQT (Fall 2021) by subject, grade level, and demographic characteristics.

- A higher percentage of Asian, White, and G/T students met CCR benchmarks than African American Hispanic, or at-risk students, regardless of PSAT assessment (Figures 9A-9F, pp. 13-16).
- For 2021, regardless of demographics or assessment, a higher percent of students met the CCR benchmark for ERW than mathematics.
- For all grade levels and assessments, only 7 percent of at-risk students met both CCR benchmarks.

PSAT Participation and Performance by Campus
Table 1A (p.17) shows the number and percentage of eighth grade students tested, average PSAT 8/9 scores, and the number and percentage of students meeting the ERW, mathematics, and both CCR benchmarks by campus.

- There were five schools with perfect participation on the PSAT 8/9. These included: Briarmeadow Charter, Wharton K-8, Baker Montessori, Garden Oaks, and Chrysalis Middle School.
- T.H. Rogers School had the highest average total score at 1068 as well as having the highest percentage of eighth grade students who met both the ERW and mathematics CCR benchmarks at 78.8 percent.
- Four secondary schools did not participate in testing students on the PSAT 8/9 in 2021, but they had participated in 2019. These schools included: Forest Brook, Henry, and Navarro middle schools and one PK-8 school, Young Scholars, which closed at the end of the 2020-2021 school year.

| Campus | PEIMS <br> Grade 8 | \# Tested | \% Tested | Mean Total | Mean ERW | Mean Mathematics | \# Met ERW | \% Met ERW | \# Met Mathematics | \% Met Mathematics | \# Met <br> Both | \% Met Both |

"- -" indicates no students tested
Sources: College Board PSAT 8/9 data file, 3/21/20221; Fall PEIMS Snapshot, 2021

- Carnegie High School had the highest average total score at 1132 and the highest percentage of students who met both ERW and mathematics CCR benchmarks at 89.9 percent, followed by DeBakey High School and Kinder HSPVA.
- Kinder HSPVA and Middle College High School-Fraga tested the highest percentage of students at 100.0 percent.
- Milby High School tested their ninth-grade students in 2019 but did not participate in 2020 or 2021.

Table 1C shows the number and percentage of tenth grade students tested, average PSAT/NMSQT scores, and the number and percentage of students meeting the ERW, mathematics, and both CCR benchmarks by campus.

Note: Due to mobility, campuses may have participation rates exceeding 100 percent. Tenth grade students at North Houston Early College High School took the PSAT 10 and their results are not included in this report.

- Carnegie High School had the highest average total score at 1157 and the highest percentage of students who met both the ERW and mathematics CCR benchmarks at 82.4, followed by DeBakey Highs School and Kinder HSPVA. All three high schools tested at least 97.6 percent of their tenthgrade students.
- Eastwood High School and Middle College High School at Fraga tested all their tenth graders.
- North Houston Early College High School did not participate in testing tenth grade students on the PSAT/NMSQT this year, but in 2019, tenth grade students took the PSAT/NMSQT.

Table 1D shows the number and percentage of eleventh grade students tested, average PSAT/NMSQT scores, and the number and percentage of students meeting the ERW, mathematics, and both CCR benchmarks by campus.

Note: Due to mobility, campuses may have participation rates exceeding 100 percent.

- Carnegie High School had the highest average total score at 1207 and the highest percentage of students who met both CCR benchmarks at 84.0 percent, followed by DeBakey High School with an average total score at 1175 and 79.8 percent of students who met both CCR benchmarks.
- Challenge Early College High School, YWCPA, Energy Institute High School, East Early College High School, and HSLJ, had the highest participation rates at 100 percent.

## Conclusion

HISD launched the PSAT for All initiative in 2003 as way to enroll more students in Advanced Placement courses and prepare them to be successful on the SAT which is required by most colleges. The districtwide initiative enabled all HISD tenth graders to take the PSAT/NMSQT for free. On August 12, 2010, the HISD Board of Education expanded the PSAT for All program to include incoming ninth graders for the 2010-2011 school year. Currently, the district supports participation in the PSAT 8/9, PSAT 10, and the PSAT/NMSQT by paying for the exams in grades 8 through 11.

## COVID-19 Impacts in 2020

In 2020, PSAT participation decreased for all grade levels, with the largest decreases occurring for eighth and ninth grade students. For example, the district administered the PSAT to 33 percent of students in grade 8,30 percent of students in grade 9,32 percent of students in grade 10 and 49 percent of students in grade 11 in 2020. These participation rates are markedly lower than the 76 percent to 82 percent ranges that occurred in 2019. ${ }^{5}$ Participation was further impacted by the district policy for test administration requiring remote learners to test at their home campuses. Campuses such as Houston MSTC and Milby high schools did not test any of their ninth or tenth grade students in 2020. When comparing the number of students tested, Hogg Middle School tested 87 students in 2020 compared to 298 in 2019. As a result of testing fewer students, but more academically prepared students, the percentage meeting both CCR benchmarks increased from 40.3 percent in 2019 to 64.4 percent in 2020.

Another change in district policy directed tenth grade students to take the PSAT 10 rather than the PSAT/NMSQT for 2020. According to the College Board, the PSAT/NMSQT and the PSAT 10 are the same test, but the PSAT/NMSQT is offered in the fall and the PSAT 10 is offered in the spring. ${ }^{6}$ More importantly, only scores from the PSAT/NMSQT are used to find eligible students for the National Merit Scholarship Program®.

Although the College Board expanded test administration windows to ensure the health and safety of the students and staff, district participation for PSAT assessments was negatively impacted. All of these factors limit comparability of 2020 results across years.

2021
Participation rates for 2021 are recovering to the 2019 pre-pandemic levels. Eighth and ninth grade participation rates have declined by 5 percentage points, while grades 10 and 11 have declined by 2 percentage points and 1 percentage point, respectively. This decline may be attributed, in part, by the schools that did not participate in testing their eighth and ninth grade students.

An analysis of performance on the PSAT 8/9 and the PSAT/NMSQT revealed that mean subject and total scores for the district were lower than those for Texas and the total group at all grade levels. Mean mathematics scores were higher than ERW scores for HISD grades eight and ten, but mathematics scores
were still lower than their state and total group counterparts. Conversely, mean ERW scores were higher than mean mathematics scores for HISD grade eleven students, but ERW scores were still lower than their state and total group counterparts. Students at all grade levels were less likely to meet CCR benchmarks compared to their state and total group counterparts. However, a higher percentage of HISD students met the CCR benchmark in ERW compared to mathematics. This is true for the state and the total group. Performance differences existed across race/ethnicity in both assessments as well as across campuses. Regardless of assessment or grade level, only 7 percent of at-risk students met both CCR Benchmarks.

The district should take steps to increase participation in the PSAT Suite of Assessments so that students are exposed to college readiness exams. Moreover, at-risk students require additional academic and support services so that they may reach their full potential.
