Computer Parts and Functions
Computer Monitor

It shows you what you type or what the processor is doing.
Central Processing Unit (CPU)

It contains the processor, which is like the computer’s brain.
Computer Keyboard

It lets you type letters, numbers, and symbols that show up on a screen.
Computer Mouse

It lets you move your pointer or cursor around the screen.
Computer Speakers

These let you hear sounds played on a computer.
Printer

It copies information from the computer onto a piece of paper.
