Forms & Surveys Recommended Practices

Here are some recommended practices for Forms & Surveys.

- For each type of question, you can choose whether to make the item required. Users will not be able to complete the form without answering those specific questions.
- Be sure not to create too many items on one page. Add multiple pages to minimize scrolling. Users will be able to click next to view your additional pages/items.
- When using piping, you must put the piped answer on a subsequent page.
- You must change the status of the form to Active to allow data to be entered and recorded.
- You may not make extensive edits to a form without first clearing responses. If you need to retain the data, export it before you edit the form.
